

Splunk Fundamentals

Overview

This project focuses on learning the fundamentals of Splunk, a powerful SIEM (Security Information and Event Management) and log analysis platform used for monitoring, searching, analyzing, and visualizing machine-generated data.

The purpose of this project is to gain

The screenshot displays the Splunk Search interface. The search query is `host="kali"`, and it has returned 15,211 events. The results are shown in a table format, with columns for Time and Event. The table lists several events related to user sessions and commands executed on the kali host.
